PROFILE

MCA graduate specializing in Full Stack Development and AI-driven applications with hands-on experience in React, FastAPI, PostgreSQL, REST APIs, and cloud deployment. Skilled in building and deploying production-ready solutions integrating Generative AI, CI/CD pipelines, and scalable backend architectures. Proven ability to design robust, efficient software systems. Actively seeking entry-level Software Developer or Backend Engineer roles to leverage technical expertise and contribute to innovative projects.

EDUCATION

2026 MCA | Computers

CMR Institute of Technology, Bangalore

Grade – 9.03/10

2024 BCA | Computers

Kuvempu University, Karnataka

Grade - 7.7/10

2021 12th

Karnataka

Marks – 72.33%

2019 10th

Karnataka

Marks – 84.13%

SKILLS

Languages: Java, C, JavaScript, Python, HTML, CSS

Frameworks & Libraries: React 18, FastAPI, Tailwind CSS, SQLAlchemy

Databases: PostgreSQL, MySQL, pgvector, Redis

AI & Computer Vision: YOLOv8, OpenCV, Face Recognition, PyTorch

DevOps & Deployment: Docker, Docker Compose, Containerized Deployment, CI/CD

Tools & Platforms: Git/GitHub, VS Code, Postman, Vercel, Hugging Face Spaces, Supabase, MinIO

APIs & Integration: REST APIs, WebSockets, OAuth 2.0, JWT Authentication, RBAC, LTI 1.3, Google Gemini API

CERTIFICATIONS

- [Certified in “Java” through Udemy](#)
- [Certified IBM SkillsBuild Virtual Intern – AI & Cloud Technologies](#)
- [Certified in “ML with Python” through Infosys Springboard](#)
- [Certified in “Think Build Showcase” through college level competition](#)
- [Certified in “Front End Web Developer “ through Infosys Springboard](#)

WORK EXPERIENCE

AICTE & Edunet Foundation | Bangalore, India

IBM SkillsBuild Virtual Internship on AI & Cloud Technologies | July 2025 – August 2025

- Completed a 4-week virtual internship gaining hands-on experience in Artificial Intelligence (AI), Machine Learning (ML), and Cloud Computing.
- Developed, tested, and deployed multiple AI/ML models on IBM Cloud, including Generative AI and Gemini-based models, using Jupyter Notebook for data preprocessing and experimentation.

- Designed and implemented two Retrieval-Augmented Generation (RAG) systems, including an IBM Watsonx Assistant chatbot and a LangChain-powered content generation solution, improving contextual data retrieval accuracy by ~20%.
- Earned foundational certifications in AI and cloud platforms, strengthening skills in data analytics, problem-solving, and cloud-based application deployment.

PROJECTS

FixForge – Full-Stack Web Application for Bug Tracking, Community Solutions | August 2025 – December 2025

- Developed a full-stack bug tracking platform incorporating AI-assisted debugging and community-driven solutions to enhance issue resolution efficiency.
- Implemented pgvector-based similarity search algorithm, reducing duplicate bug reports by 70%, significantly improving triage accuracy.
- Integrated Google Gemini API to automate root cause analysis and provide actionable fix suggestions, accelerating debugging processes by an estimated 40%.
- Engineered FastAPI backend featuring OAuth 2.0 authentication, real-time WebSocket communication, and automated CI/CD pipelines using GitHub webhooks for streamlined deployment.
- Deployed the platform across Vercel, Hugging Face Spaces, and Supabase PostgreSQL, ensuring scalable, high-performance, and reliable cloud hosting infrastructure.

Tools & Technology: React 18 | Vite | Tailwind CSS | Monaco Editor | FastAPI | Python 3.11 | Supabase (PostgreSQL, pgvector) | Google Gemini API | Vercel | Hugging Face Spaces | OAuth 2.0 | WebSocket

Live Deployment: <https://fixforge.vercel.app>

Project: AI-Powered Hybrid Proctoring System | December 2024 – Present

Description:

- Engineered a scalable Hybrid Deployment Model supporting both stand-alone and LMS Plugin (LTI 1.3) integration, enabling seamless, single-sign-on (SSO) authentication with platforms like Moodle and Canvas.
- Developed real-time computer vision proctoring using YOLOv8 and Face Recognition, achieving 95%+ accuracy in detecting cell phone usage and unauthorized personnel with sub-500ms latency.
- Architected a high-concurrency backend with FastAPI and WebSockets, supporting live monitoring feeds for hundreds of simultaneous student sessions with automated state synchronization.
- Enhanced Administrative Efficiency by 80% by designing a real-time React.js dashboard featuring "Smart Timelines" that allow instructors to quickly review only suspicious highlights instead of full exam videos.
- Optimized evidence storage and security by integrating MinIO (S3 object storage) and automated retention policies, resulting in a 60% reduction in server storage costs.
- Deployed a production-ready infrastructure using Docker Compose for containerized, cross-platform deployment, featuring Role-Based Access Control (RBAC) and secure identity management.

Tools & Technologies: React.js | Vite | Redux | Tailwind CSS | Chart.js | Python 3.9+ | FastAPI | SQLAlchemy | PostgreSQL | Redis | YOLOv8 (Object Detection) | OpenCV | Face Recognition | PyTorch | LTI 1.3 Plugin (OIDC/JWT) | Bcrypt | RSA Key Pairs | OAuth2.0 | Docker | Docker Compose | MinIO (Object Storage) | WebSockets | Git.

ACHIEVEMENTS

- Showcased AI Tutor for Enhanced Learning at Think Build Showcase (CMRIT, 2025)
- Attended SecurityBoat Cybersecurity Meetup (2025)
- *Participated in Nokia Meetup on Knowledge Graphs for GenAI & Beyond (2025)*

EXTRA-CURRICULAR ACTIVITIES

- **Hackathon Winner – STACKATHON (AI in Commerce)** | CMR Institute of Technology & Unicornready Technologies.
- **ByteBattles 1.0 – The DSA Hackathon (2025)** - Competed in multi-round algorithmic challenges, enhancing problem-solving and coding efficiency under time constraints.
- **Student Coordinator – Protocol Club (2024–2025)** - Recognized with a Certificate of Appreciation for active contribution and leadership in organizing club activities.
- **Club:** Vice President of the Communication Club, organized events such as group discussions, debates, and public speaking
